There is a stream inside the park and one has to cross a bridge to get near the edge of the canyon. The scenic beauty from the edge is awe inspiring. On the other side of the Eco Park is a view point to see the Bangladesh plains. The Eco Park also houses a wide variety of orchids, courtesy the Shillong Agri-Horticultural society.
2. **Mawsmmai caves**, situated around 6 Kms from Cherrapunjee, the Mawsmmai Caves are a major crowd puller that leaves tourists spellbound. These limestone caves have the distinction of being the only caves in Meghalaya that are lit enough to enable tourists to enjoy the natural formations in awe. Though the caves are long, only a distance of 150 meters is open for tourists, while the other section is closed. The stalactites and stalagmites caves have innumerable forms, shapes and sizes inside leaving one to imagine as many life forms as possible. This magnificent natural wonder is the handiwork of years of natural abrasion and underground water.
3. **Seven Sister Falls**, plunging down a height of 1,035 ft, the Nohsnghithiang Falls is the fourth highest waterfall in India. This falls is located a few kilometers from Cherrapunjee and is one of the major tourist attractions.

This waterfall is also known as Seven Sister Falls or Mawsmmai Falls, the latter being the name of a village The Seven Sister Falls derives its name from the seven streams that flow down the plateau like feature. This is a must see attraction during the monsoons, when the streams are inundated with water and flow down rapidly forming a perennial rainbow much to the delight of tourists.

4. **Nohkalikai Falls**

5. **Dainthlen Falls**

6. **The Living Root bridges** are made from the roots of the Ficus elastica tree, which produces a series of secondary roots that are perched atop huge boulders along the streams or the riverbanks to form bridges.

The living root bridges, some of which are over a hundred feet long, take ten to fifteen years to become fully functional, but they're extraordinarily strong – strong enough that some of them can support the weight of fifty or more people at a time.
