1. **Mawsmmai caves**, situated around 6 Kms from Cherrapunjee, these limestone caves have the distinction of being the only caves in Meghalaya that are lit enough to enable people to enjoy the natural formations inside. Though the caves are long, only a distance of 150 meters is open for tourists, while the rest is closed. The stalactites and stalagmites in the caves come in innumerable forms, shapes and sizes. This magnificent natural wonder has been created by years of natural abrasion and flowing underground water.

2. **Seven Sisters Fall**, plunging down a height of 1,035 ft, the Nohsngithiang Fall is the fourth highest waterfall in India. This fall is located a few kilometres from Cherrapunjee. The fall derives its name from the seven streams that flow down the plateau. This waterfall is also known as Seven Sister Fall or Mawsmmai Fall, the latter being the name of the village - a must see during the monsoons, when the streams are inundated with water and flow down rapidly forming a perennial rainbow.

3. **Nohkalikai Fall**

4. **Dainthlen Fall**

5. **The Living Root bridges (Umkar Root Bridge)** are made from the roots of the *Ficus elastica* tree, which produces a series of secondary roots that are perched atop huge boulders along the streams or the riverbanks to form bridges.

The living root bridges, some of which are over a hundred feet long, take ten to fifteen years to become fully functional, but they're extraordinarily strong – strong enough that some of them can support the weight of fifty or more people at a time. The bridges are alive and still growing and gain strength over time.
